

THE TOP FIVE

TIPS FOR BRINGING THE OUTDOORS IN

1 GROW CLIMBERS ON FENCES

Plant a non-intrusive creeper such as a climbing fig that will adhere to a

fence. It creates a lush, green outlook and hides the fence. And you need a garden bed only 80 to 100mm wide to grow it.

2 USE POTTED COLOUR

Flood balconies and decks with colour in pots. These areas are often an extension of main interior living areas, so use lots of pots of flowers, herbs and succulents and create a green oasis that not only looks good outside, but can be seen from inside.

3 POT PLANTS INSIDE

Terrariums are making a comeback and look fabulous as a decorative piece. A standard pot

plant is also a great way to have long-term flowers, or just greenery, in the house.

4 ADD GREEN OUTSIDE WINDOWS

Plant green features out every window in pots or window boxes or use something such as bamboo to create a green feature that can be seen to give a calm feeling inside.

5 TAKE CUTTINGS

Use greenery from the garden in vases. Snip green foliage that is perfect for creating a touch of nature inside.
